NOTE.—Tables 9 and 10 are based upon the records of the Commonwealth Meteorologist. The divisions correspond approximately with the statistical divisions shown on the map in frontispiece of the Official Year Book of New South Wales, each division being subdivided into two sectors indicated by the letters N, S, E, or W according as they constitute the northern, southern, eastern, or western portion of the division concerned. Normal Rainfall is based on a period ended 1929.

No. 33. Monthly Production Statistics, New South Wales :  
Quantities of Certain Articles Manufactured and Mined

The following statistics of production are obtained principally by means of returns collected from producers monthly. Annual totals for 1956-57 and earlier years, however, are derived principally from annual factory returns (relating in most instances to the year ended 30th June).

Particulars in this table have been revised since last issue on the basis of the annual<sup>1</sup> returns for 1956-57. The figures for 1957-58 and for all months from July, 1957 are subject to revision.

# No. 34. Value of Building\* Approved: Private and Government by Areas of New South Wales

- Note. 1. "Value" represents the estimated cost of the building when completed, excluding the cost of the land on which the building is erected.  
 2. Building is classified as "Private" or "Government" according to ownership.  
 3. The value of building approved is, for private building, the value of permits issued by local government authorities to build in that part of the State (covering all municipalities and the larger residential areas within shires) subject to building control by local authorities; and for government building, the value of contracts let or work commenced and day labour projects authorised by governmental authorities.  
 4. Some building in rural areas is excluded.

## No. 43. Retail Trade : Total Value of Sales in New South Wales

(Adjusted on a basis comparable with the 1952-53 Retail Census)

Statistics for 1948-49 and 1952-53 were compiled from returns supplied by each retail establishment in the State, but statistics for later years are estimates based on returns collected from a representative sample of retail establishments.

Particulars in Table 43 relate to the retail sales of goods (as distinct from services, accommodation, entertainments, meals, etc.) by establishments selling retail goods from fixed premises (shops, rooms, kiosks, yards), and include the retail sales of establishments principally engaged in wholesale, manufacturing, or servicing activities.

## No. 84. Index of Prices of Shares on Sydney Stock Exchange

This index relates to ordinary shares of the principal companies (excluding banking companies) listed on the Sydney Stock Exchange whose business in New South Wales is extensive.

The prices of individual shares are unweighted, and each group average is the mean of the average monthly prices per £1 of paid-up capital. The aggregate index is the average of all the shares included in the groups with the addition of 34 miscellaneous shares. There is no base period as the index represents the ratio per cent. of the average prices of ordinary shares to their par values, adjustment being made where capital is written off or bonus shares are issued. Minor revisions were made in the composition of the index in August, 1956.

Average for Period.	23 Manufacturing and Distributing Companies.	10 Retail Companies.	4 Pastoral and Finance Companies.	4 Insurance Companies.	Total 75 Companies.*	34 Active Shares included in foregoing.

### "Sydney and Suburbs"

On 1st January, 1954, the boundaries of the Statistical Metropolis, as defined since 1933, were extended to embrace the Municipalities of Fairfield and Holroyd and the Shires of Sutherland and Warringah, together with portions of the Municipality of Liverpool and of the Shires of Baulkham Hills, Blacktown, and Hornsby. In Tables 86 and 89, the group "Sydney and Suburbs" differs from the Statistical Metropolis because it includes particulars for the whole of the Municipality of Liverpool and the whole of the Shires of Baulkham Hills, Blacktown, and Hornsby.

# No. 91. Wage and Salary Earners in Civilian Employment in N.S.W. : Government and Private

(1) Particulars in Tables 90 and 91 are estimates based on the Census of 1933, the National Register of 1939, the Civilian Register of 1943, the Occupation Survey of 1945, annual censuses of factories, and returns supplied monthly by employers for purposes of pay-roll taxation and by governmental authorities.

(2) The number of employees recorded on Pay-roll Tax returns relates to those whose names appeared on the last pay-roll of the month, irrespective of whether they were actually working at the end of the month.

(3) Working proprietors, wage earners in rural industry, females in private domestic service, members of full-time defence forces at home or abroad, National Service Trainees in camp, and Government "relief" workers are not included.

# No. 92. Employment in Larger Private Factories, New South Wales

In order to provide a prompt indication of the trend of employment in private factories, a survey of employment in 631 larger privately-owned factories in New South Wales is made each month, by joint arrangement between the Secretary of the Department of Labour and National Service and the Commonwealth Statistician. Approximately half of total factory employment is covered by the collection, the results of which are available one month earlier than the particulars of total factory employment shown in Table 90.

## No. 95. Export Price Index Numbers, Australia

These index-numbers are compiled from the prices of 20 commodities which normally constitute about 80 per cent. of all exports. For some metals, and for wheat (from July, 1945 to September, 1951), the index of prices is deduced from the average value of current sales or shipments and hence shows some irregularity. In this index the prices of the commodities are weighted by the average annual exports (production in the case of gold) during the three years 1933-34 to 1935-36.

(Base of each section: Average of 3 years ended June, 1939 = 100)

## No. 96. Wholesale Price (Basic Materials and Foodstuffs) Index Numbers

The eighty commodities included in this index are priced in their primary or basic form wherever possible. The prices used have, in the main, been obtained directly from manufacturers and merchants, and, with a few important exceptions, from Melbourne sources. Apart from locally produced building materials and one or two minor commodities, however, the price movements may be taken as representative of variations in wholesale prices of basic materials in most Australian markets. The weighting system adopted is based on estimates of the average annual consumption of the commodities in Australia during the years 1928-29 to 1934-35 inclusive.
